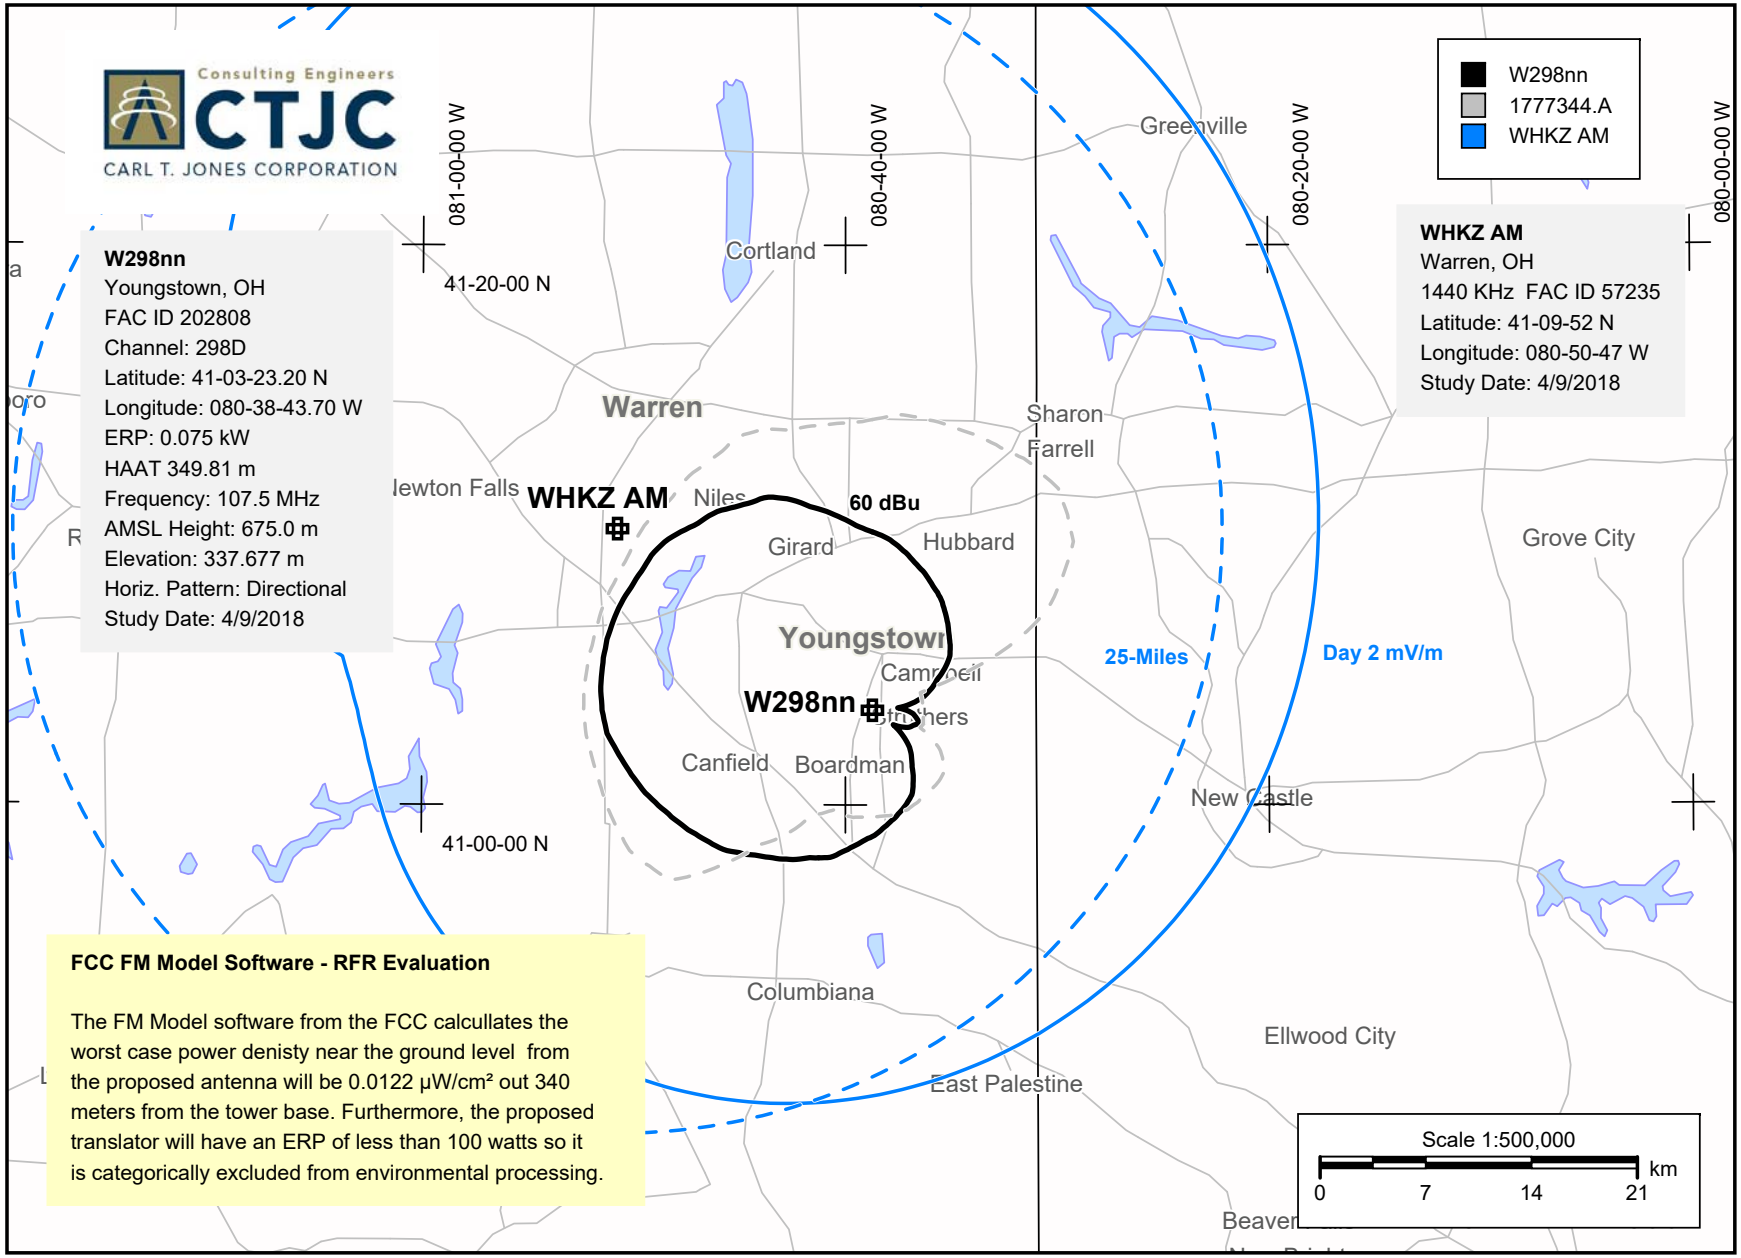
Exhibit 10 - Translator Coverage Map for NEW 107.5 FM Fill In for WHKZ AM



FCC FM Model Software - RFR Evaluation

The FM Model software from the FCC calcullates the worst case power denisty near the ground level from the proposed antenna will be 0.0122 μW/cm² out 340 meters from the tower base. Furthermore, the proposed translator will have an ERP of less than 100 watts so it is categorically excluded from environmental processing.
