Re: Tyler Media L.L.C. (TML)
KOKC (AM), Oklahoma City, Oklahoma
Facility Identification Number: 73981
Special Temporary Authority (STA)
BESTA- 20130904AAB

Dear Mr. Trent:

This is in reference to the request filed on September 4, 2013. TML requests extension of the STA granted on December 4, 2012, to operate with parameters at variance from license values and/or reduced power while maintaining monitor points within license limits.¹ In support of the request, TML states that it plans to file an FCC Form 302 license application with a method of moments proof after all repairs have been completed.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for STA IS HEREBY GRANTED. Station KOKC may operate

¹ KOKC is licensed for operation on 1520 kHz with a 50 kW daytime ND antenna, and a 50 kW nighttime DA antenna.

with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. TML must notify the Commission when licensed operation is restored.² TML must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **March 26, 2014**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Szczesny', with a large loop at the end.

Joseph Szczesny
