

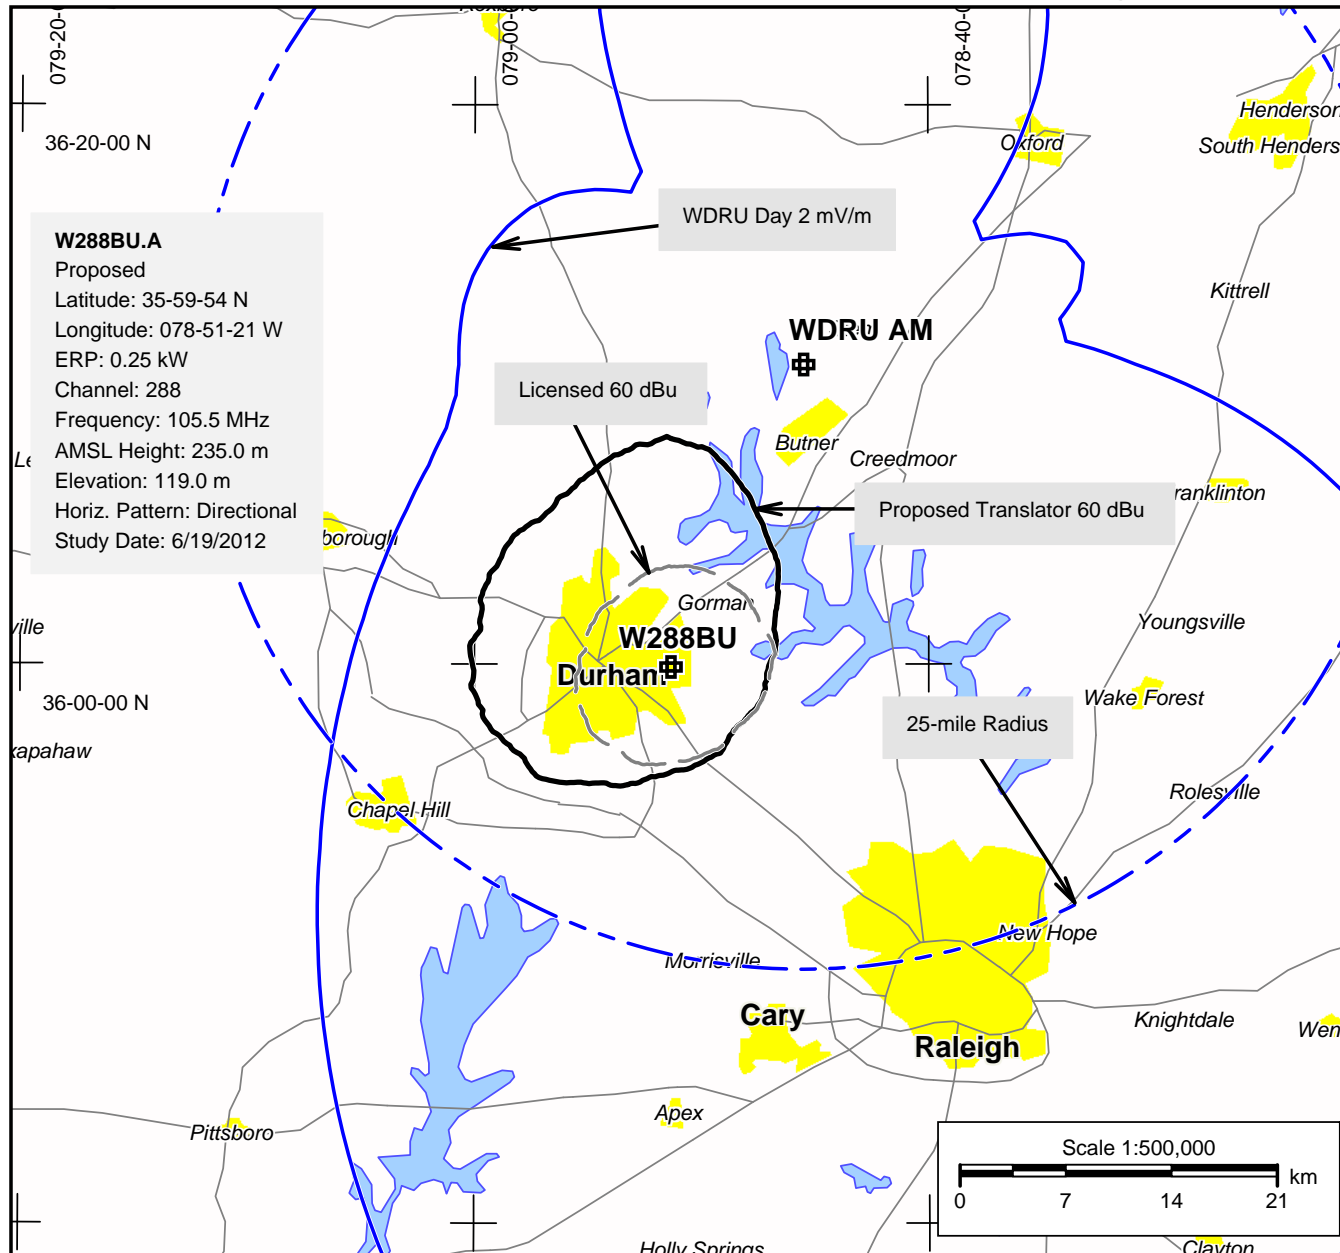

## Exhibit 10 - W288BU Application to Increase Power, Change Pattern

### W288BU Durham, NC Application

for minor mod CP changing antenna type to Shively 6810 single bay directional as a fill-in translator for AM Station WDRU 1030 kHz, Creedmoor NC.

The proposed translator F(50,50) 60 dBu contour is wholly within both the Day 2 mV/m contour and a 25-mile radius of WDRU AM.

The proposed 60 dBu contour overlaps the presently licensed 60 dBu contour of W288BU.

Supporting Structure is registered as FCC ASR 1005705. Tower is 128m above ground overall and 247m AMSL overall.

A single bay Shively 6810 directional antenna is proposed.

FCC FM Model shows the proposed operation will have a maximum Power Density of 0.137 uW/cm<sup>2</sup> out 118 meters away from the base of the tower at ground level. Therefore the instant operation is categorically excluded with regard to EPA rules.
