Re: Mapleton License of Spokane, LLC (MLS)
KJRB(AM), Spokane, WA
Facility Identification Number: 11235
Special Temporary Authority (STA)
BESTA-20171026AAK

Dear Mr. Shea:

This is in reference to the request filed on October 26, 2017. Mapleton requests an extension of the STA granted on May 11, 2017, to continue to operate at night with parameters at variance along with co-located station KGA (ID#11234) due to unresolved antenna system problems.¹ In support of its request, MLS states that it plans to resolve all problems and resume licensed operations, or file an FCC Form 301 application to change the antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KJRB(AM) is licensed for DA operation on 790 kHz with 5 kW day and 3.8 kW night, using different patterns.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and MLS may continue to operate at night with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits (with no change to the daytime licensed operation). MLS must further reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See 47 CFR § 1.1310.* MLS must submit an e-mail to my attention to certify the date the station resumed licensed operations (per BMML-20130820ACI) to ensure an FCC Form 302 application filing is not needed. Otherwise an FCC Form 301 application must be filed if MLS has decided to permanently change the antenna system.

This authority expires on **May 14, 2018.**

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke.
