

EXHIBIT 1

The Denver Foundation, Inc. is dedicated to preserving and celebrating the history of Princeton, West Virginia and supporting the growing tourist activities in the area. In addition to the providing information and programming of historical interest, the Foundation supports and promotes a variety of community events.

Access to the airwaves is instrumental in the Foundation's mission. Radio will allow the Foundation to provide information to both local residents and tourists, many of whom would not necessarily take the time to obtain and read a newspaper or similar publication featuring the same information.

The station's programming will be a series of feature reports on the community's history and culture, current community events, a community calendar, broadcasts of community events such as school sporting events and graduations, and regular updates of local weather and community news. Interspersed among these features will be music from the "Golden Oldies" era of the 1950s and 60s.

In addition to its own regularly scheduled programming, the Foundation will make its resources available to local non-profit groups such as hospitals and little leagues to assist with fund raising and community awareness of the groups' services.
