SUPPLEMENT TO EXHIBIT 14

In Exhibit 14 of the application as originally filed, the assignee showed, among other things, that the proposed assignment is in compliance with Section 73.3555(b)(2)(i) of the Rules, the so-called "Top-4" provision of the Television Duopoly Rule. Specifically, the assignee showed that WBPG(TV) is not among the top-4 stations in the Mobile-Pensacola Designated Market Area (DMA) based on the most recent Nielsen data.

By way of elaboration, attached hereto is a page from the Nielsen Station Index, July 2002, for the DMA. Information for the 9 A.M.-Midnight daypart (the daypart relevant to Section 73.3555(b)(2)(i)) is outlined in bold.[1] That information shows that the overall shares and in-market shares of the top 5 stations in the market are as follows:[2]

Station	Overall Share	In-Market Share
WKRG	14	32
WEAR	9	20
WPMI	8	20
WALA	8	19
WJTC	3	8

Thus not only is WBPG(TV) not among the top 4 stations in the market, it is not among the top 5. In fact, the attached page shows no share data for WBPG(TV), meaning that its share was .5 or less, since Nielsen reports share information only for stations with a share of .6 or more (which is rounded up to 1).

---

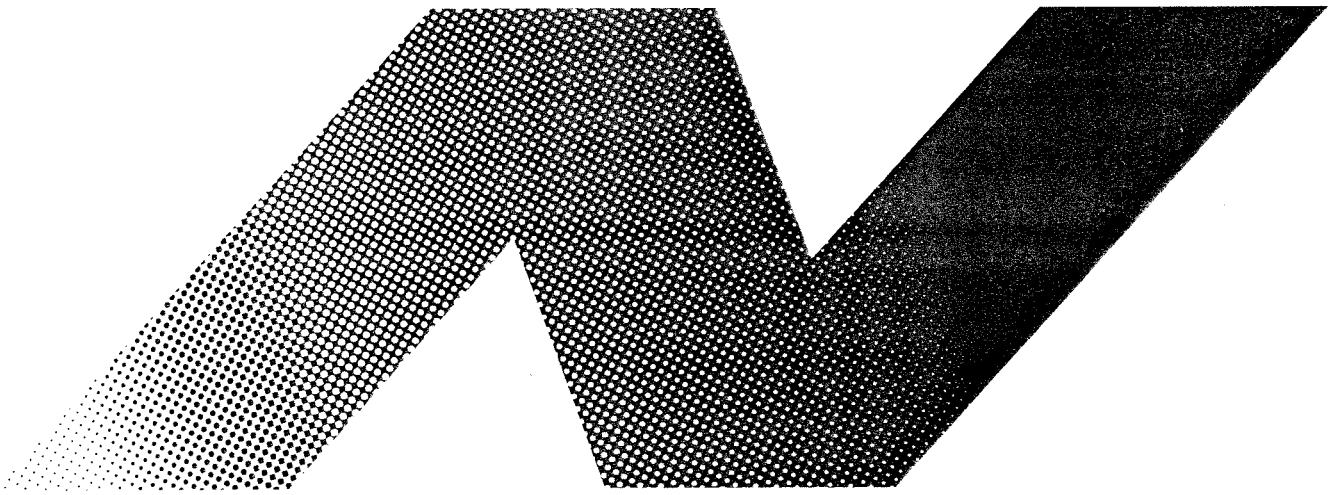

[1] The information for the 6 AM to 2 AM daypart at the bottom of the page was circled inadvertently, but is not pertinent to Section 73.3555(b) compliance.

[2] Overall share is the share of viewing of all video services available in the market, including non-broadcast (e.g., cable) channels. In-market share is the share of viewing of over-the-air television stations in the market.
