

Three Angels Broadcasting Network
 Dan Peek—Engineer
 P.O. Box 220
 West Frankfort, Illinois 62896
 February 13, 2009

In evaluating the proposed displacement for W21BW, FID 67024, an outgoing interference study was executed on the proposed parameters on channel 28(T) with an ERP of 760W. The stations in the table below were considered possible interference. No stations were found to receive interference from the proposed station which would require Longly-Rice analysis. Also the 19dBu (50,10) curve did not cross the Canadian border thus Three Angels Broadcasting Network respectfully requests that the requirement for international coordination be waived. Please see coverage map below.
