

# **EXHIBIT 11**

## **NARRATIVE**

This application is for authority to construct a new translator located near **Quitman, Texas**, NAD 27 coordinates **N 32 47 30, W 95 27 03**. FCC Public Notice **DA 03-2095** dated June 30, 2003 listed those applications that are “singleton” from the results of the filing window of March 10, 2003 through March 17, 2003. This “singleton” application, file number **BNPFT 20030317JLH** is listed in Attachment A of DA 03-2095.

This application meets all requirements of C.F.R. 47 Section 74.1204.

**Exhibit 12.0** is the study list for channel 232.

**Exhibit 12.1** is a showing of the proposed channel 232 100-dBu interference contour to the NEW-X channel 234 60-dBu protected contour.

**Exhibit 12.2** is a showing of the proposed channel 232 40-dBu interference contour to the KLNALP-LIC 60-dBu protected contour. KLNALP-CP file BMPL 2003403ACW is a move away from proposed translator interference 40-dBu contour.

This application meets all requirements of 47 C.F.R. Section 74.1205 as the output channel is above the cutoff for channel 6 issues and EPA requirements under 47 C.F.R. Section 1.1306. This proposal does not have a significant environmental impact and does comply with RF exposure limits.
