***Affixed to 'IN' or 'Out' values = site inside protected contour.
ERP and HAAT are on direct line to and from reference station.

Exhibit 12 (Compliance with CFR 74.1204)

The proposed FM Translator is located within the protected 60 dBu contour of third adjacent channel station KLUR, channel 260C1, Wichita Falls, TX. The predicted F(50-50) field strength of KLUR at the proposed translator site is greater than 80.0 dBu. Therefore, the respective predicted interfering contour generated by the proposed FM Translator is 120.0 dBu. This interfering contour extends less than 92 meters from the proposed transmit antenna, and the area of overlap does not reach the ground.

Therefore, EMF respectfully requests a waiver of C.F.R. 74.1204 based on no population within the area of predicted interference.
