

EXHIBIT 1

This application proposes to displace W26DC-D with Channel 6 at the station's licensed site. Beginning when W26DC-D, Channel 26, Roslyn, New York, began operation with its digital facilities (File No. BLDDT-20140310ADR), the station has been experiencing harmful interference from WYXN-LD, Channel 26, New York, NY. The protected contours of co-channel stations W26DC-D and WYXZ-LP overlap. See Attachment 11.

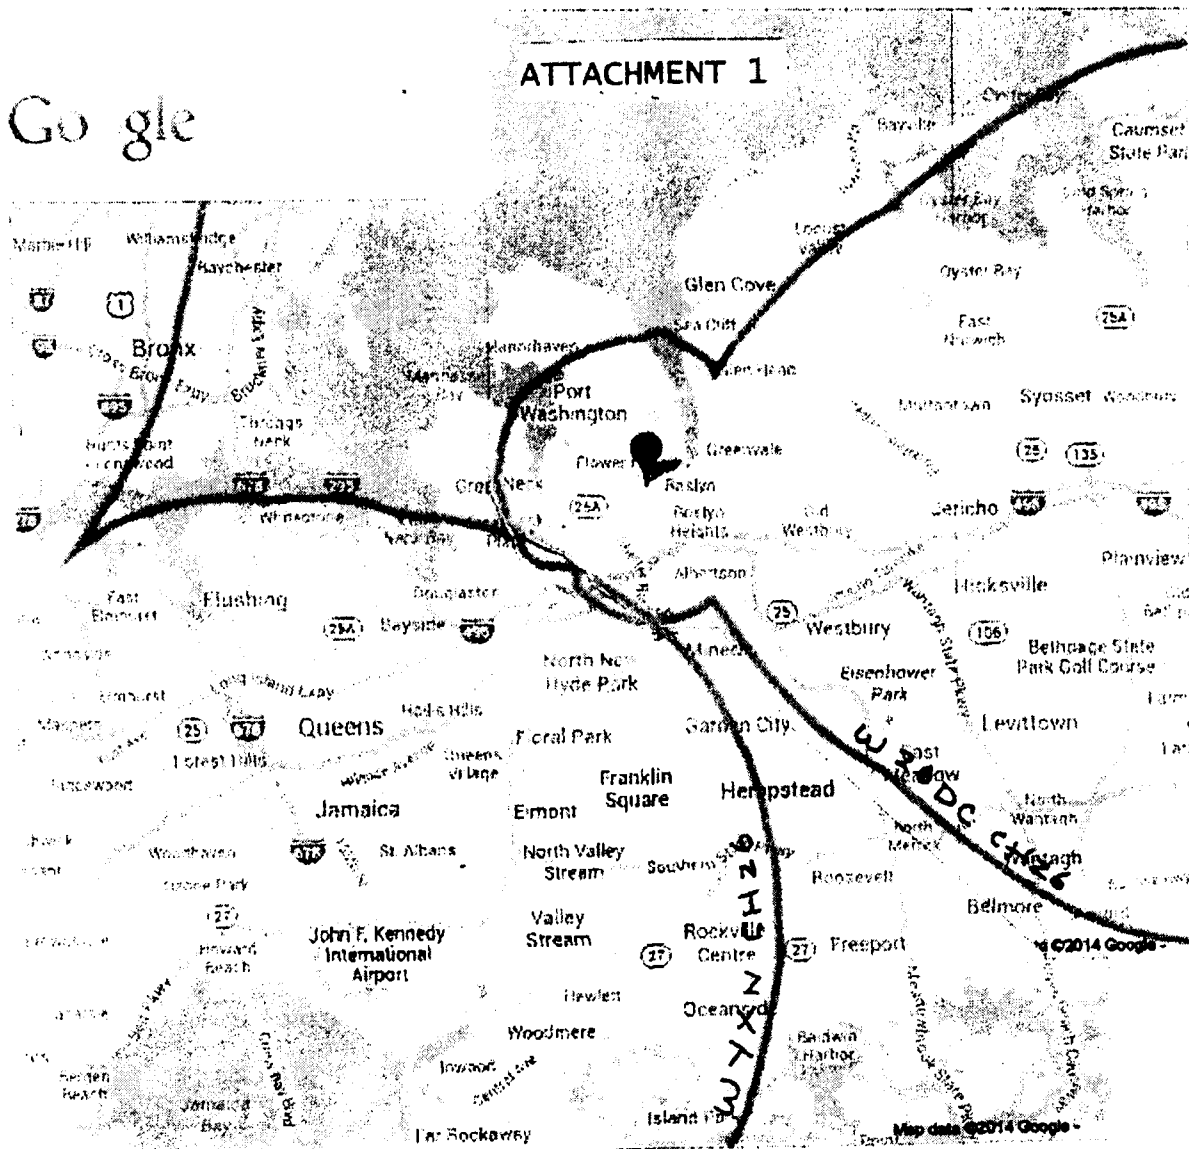

A search for another channel where less interference would be caused reveals that every channel from 2-51 either has a protected contour encompassing the current site, or must provide land mobile protection to the current site. See Attachment 2. The only exception is Channel 6, which receives only 6 db interference from its primary station, WNYZ-LP, Channel 6 New York, NY (W26DC-D rebroadcasts the signal of WNYZ-LP.). The interference received to W26DC-D from WYXN-LP, channel 26, is 17 db, which is considerably higher than the 6 db that is predicted to be received by a channel 6 station. Channel 6 also receives the least amount of adjacent channel interference, and will be least affected in the repacking. As demonstrated in the attachment, Channel 6 is its best channel available as a displacement channel. Section 74.787 (a) (4) of the Commission's rules.
