

## Radiofrequency Electromagnetic Field Measurements for KCFR/KVOD

March 22, 2018

John Van Milligan  
RF Engineering Director  
Colorado Public Radio

Measurements were made throughout the transmitter site area using an ETS-Lindgren HI-2200 RF Survey Meter. The highest reading found was 9% of the Occupations/Controlled Exposure limit. This spot is inside and already fenced with signage posted area. Outside of the fenced area the all readings were below 5% Occupational (11% General Population).
