Subject: WDDN Tower

The correct tower registration number is 1042694. This is a three tower AM directional. 1042694 is the main 229.9m tower. 1042695 & 1042696 are the shorter 61m directional towers it uses at night. It was wrong on the BLTTL-20080327AAI application and when I did the STA, I pulled the info off that.

Do I need to amend or will an email suffice to fix it.

Sorry, I know you guys shouldn't be having to track these kind of errors down.
