

EXHIBIT 6
FIRST ADJACENT TO DTV CHANNEL SHORT SPACED

This application for channel 24 is short spaced to adjacent channel BLCDT-19991102ABN, KTVS-DT, channel 23, Sterling, CO, Channel 20 TV Company.

Applicant proposes to rebroadcast KTVS, channel 3 on channel 24 to extend service in Eastern Phillips County where terrain shielding to the South (but not to the North) of the transmitter site makes channel 3 highly susceptible to electrical noise (EMI) and likely will require improved signal for DTV 23 when it comes on-air. Applicant proposes to convert this translator to DTV at the appropriate time for KTVS-DT.

A letter supporting this proposal is expected shortly from Channel 20 Company but is not expected to arrive by the time this application must be submitted.

Applicant agrees to accept interference should it exist, correct it, change channels, cease operation, or whatever action is needed to correct any actual problem.

Applicant notes an error on the original engineering page submitted that shows applicant intended to rebroadcast KUSA, Denver 9 on channel 24. Correction with this application shows KTVS, Sterling 3.
