

# EXHIBIT 7

Prepared by Guy Smith in connection with minor change application For K42ET, Channel 42(-) at Snyder, TX.

## **ENVIRONMENTAL CONSIDERATIONS**

The proposed construction will not have a significant environmental impact. Calculations of RF Radiation levels have been performed in accordance with OST Bulletin No. 65, Edition 97.1, dated August 1997, for all radiation sources, present and proposed, on the tower. The total calculated RF exposure level at any accessible point in the vicinity of the tower, other than on the tower, is below 20% of the permissible exposure level for the general public.

Policies have been adopted by Ramar Communications II, Ltd. to reduce power and/or shut down transmitters as necessary in order to avoid exposure of workers on the tower, to excessive RF radiation.
