

EXHIBIT 12

Waiver Request of Section 74.1204

K206CF Austin, TX 34 Watts ERP
Minor ERP and Tower discrepancy Change
Calvary Chapel of Twin Falls, Inc. 4/2009

The proposed site is contained entirely inside the service contour of second-adjacent FM Stations KAZI Austin, TX and KMFA Austin, TX

NOTE: No other changes are proposed, other than an increase in ERP. In checking the ASR, it was found that the tower owner had made a modification in 2008, which slightly changed the coordinates, tower height and ground elevation.

KAZI

The proposed site is contained entirely inside the service contour of FM Station KAZI 204A, 1.6kW, Austin, TX. The level of least arriving protected F(50,50) signal at the proposed transmitter site is 66.2-dBu. Using the Undesired-to-Desired method the interfering contour is 106.2-dBu (free-space contour method employed). The interfering signal would, in the worst case at the maximum radial would extend 204 meters or 670 feet, from the base of the tower. The transmit antenna and 1/2" transmit cable will not be changed or modified. This proposal is to only increase ERP. Attached is a portion of the Signal Hill (TX) quadrangle, with the interfering contour marked in yellow. The map shows that there are no buildings located within the interfering contour. Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent FM Station KAZI, Austin.

KFMA

The proposed site is contained entirely inside the service contour of FM Station KFMA 208C1, 40kW, Austin, TX. The level of least arriving protected F(50,50) signal at the proposed transmitter site is 93.3-dBu. Using the Undesired-to-Desired method the interfering contour is 133.3-dBu (free-space contour method employed). The interfering signal would, in the worst case at the maximum radial would extend 9, from the center of radiation, which is already located at 169 meters AGL. The transmit antenna and 1/2" transmit cable will not be changed or modified. This proposal is to only increase ERP. Attached is a portion of the Signal Hill (TX) quadrangle, with the interfering contour marked in yellow. The map shows that there are no buildings located within the interfering contour. Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent FM Station KFMA, Austin.
