

EXHIBIT 11

NARRATIVE

This application is for authority to construct a new translator located near **Texarkana, Texas**, NAD 27 coordinates **N 33 28 46, W 94 06 28**. FCC Public Notice **DA 03-2095** dated June 30, 2003 listed those applications that are "singleton" from the results of the filing window of March 10, 2003 through March 17, 2003. This "singleton" application, file number **BNPFT 20030317JKX** is listed in Attachment A of DA 03-2095.

This application meets all requirements of C.F.R. 47 Section 74.1204.

Exhibit 12.0 is the study list for channel 288.

Exhibit 12.1 is a showing of the proposed channel 288 40-dBu interference contour to the KNAS LIC channel 288 and KNAS-APP CH 288 60-dBu protected contours. KNAS has currently an application BPH-20030428AAD before the FCC for consideration.

This application meets all requirements of 47 C.F.R. Section 74.1205 as the output channel is above the cutoff for channel 6 issues and EPA requirements under 47 C.F.R. Section 1.1306. This proposal does not have a significant environmental impact and does comply with RF exposure limits.
