

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CITICASTERS LICENSES, L.P.

This statement and the attached figures were prepared on behalf of Citicasters Licenses, L.P. ("CLLP"), a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). CLLP proposes to modify the facilities of KLOU(FM), St. Louis, MO. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales.¹

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), or are located in, or home to, the same Arbitron Metro Markets, an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.³

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of KLOU(FM) as proposed, or which is located in the same Arbitron Metro⁴ as KLOU(FM). The community of license of KLOU(FM) is located within the St. Louis, MO Arbitron Metro, and KLOU(FM) is reported by BIA as being "Home" to that Metro only. Contour overlap of the station to be modified is depicted in Figure 1.

¹ None of the following stations are attributable by virtue of a time brokerage agreement or joint sales agreement.

² Arbitron data presented herein is obtained from BIA's "Media Access Pro."

³ See 47 C.F.R. § 73.3555(a).

⁴ A station is considered to be "located in an Arbitron Metro" if the station's community of license is located within the boundaries of that Metro, or, the station is listed as "Home" to that Metro by BIA.

Arbitron Market Study

KLOU(FM) is reported by BIA as being "Home" to the St. Louis, MO Arbitron Metro. This proposal is in compliance with the local radio ownership rules for that Arbitron Metro, as evidenced by Table 2 below:

Interim Contour-Overlap Analysis

Because the principal community of the station to be modified, and the communities of all commonly-owned or attributable stations with overlapping principal community contours with the station to be modified, are located inside an Arbitron Metro, an interim contour-overlap analysis is not required.

Conclusions

In the Arbitron Radio Market studied herein, there are at least 69 radio stations, including the subject commonly-owned 1-AM / 5-FM stations, which are home to the St. Louis, MO Metro. This proposal does not affect the existing number of commonly-owned stations in the subject BIA Metro.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.
