RE: Full Service Mask Consent

Dear Eric Ferguson:

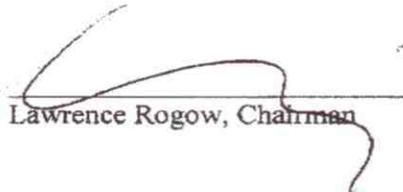

Venture Technologies Group, LLC ("VTG") is the licensee of low power television station WCHU-LP at Chicago, Illinois (Facility ID # 129745) for which VTG was granted a construction permit to operate WCHU-LP on digital channel 44 (BMPDTL-20090514ACR) and is currently operating on digital channel 44 pursuant to engineering STA BSTA- 20090729ADZ.

However, WCHU-LP will be displaced by the operation of WLS-TV on digital channel 44 as of October 31, 2009. Therefore, VTG proposes an engineering STA application to operate WCHU-LP on digital channel 33 at Chicago, Illinois. VTG proposes to use a full service mask filter to add greater protection to WEDE-CA's adjacent channel facilities. The Techware's tv\_process\_dlptv\_pt software, on a Sun Blade 1500 using the post transition data and the 2000 US Census with default analysis settings, predicts when using a full service mask filter, VTG's proposed facility only causes "*de minimis*" interference (less than 0.5%) to the analog facility of WEDE-CA on channel 34 (BLTTA-20050308AAS) as well as the construction permit for the digital facility of WEDE-CA on channel 34 (BDFCDTA-20081014AAM), at Arlington Heights, Illinois (Facility ID 66978).

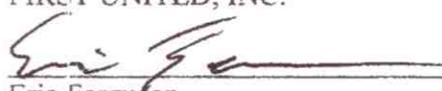

In the event that the proposed facility of WCHU-LP on digital channel 33 is found to cause more than "*de minimis*" interference to either the analog or the digital facilities of WEDE-CA, VTG will immediately take necessary actions to eliminate such interference.

In consideration of the foregoing, please indicate your consent to the proposed facility of WCHU-LP on digital channel 33 using a full service mask filter by countersign under the "ACCEPTED AND AGREED:" on this letter in the space provided below.

Sincerely,

  
Lawrence Rogow, Chairman

ACCEPTED AND AGREED:
