COCHRAN, GEORGIA
June 2009

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Georgia Eagle Broadcasting, Inc. ("GEB"), licensee of station WDXQ-FM, Channel 244A, Cochran, Georgia. GEB has a pending application to change to Channel 298A at Cochran, Georgia (BPH-20090417AJP). GEB herein amends the pending application to propose an alternative site for the facility, while still proposing operation on Channel 298A.¹

GEB is proposing to implement this change at an existing tower site. As such, the Federal Aviation Administration was not apprised of this proposal. The structure has been registered with the Commission and assigned Antenna Structure Registration Number 1243345. It is also noted that the community of license for WDXQ-FM is outside the FCC predicted 70 dBu contour of the proposed WDXQ-FM facility. However, using an alternate propagation model, it is demonstrated herein that the community of license is within the predicted city grade contour. See Exhibit B for a demonstration of the compliance of §73.313 of the rules.

From the proposed implementation site, Channel 298A does not meet the Commission's minimum distance separation requirements to one other station. Therefore, processing pursuant to §73.215 of the rules is requested. See Exhibit C for details.

1) As shown on Exhibit A, Channel 298A at Cochran, Georgia, from the proposed allocation site, meets the Commissions' allocation criteria.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to GEB and is available to the Commission upon request.²

2) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All data regarding broadcast facilities was extracted from the CDBS database. We assume no liability for errors or omissions in that database.
