

EXHIBIT 14.0 - NARRATIVE

Non-commercial Educational FM Station KWCB channel 209, Facility ID 72878, Floresville, Texas is applying for technical amendment to pending application BPED20050603ACJ to move the transmitter site and upgrade from a class C3 to class C2. This instant application is a minor change. The Community of License is Floresville, Texas. KWCB proposes to operate the upgraded facility at 50 kw ERP and 92 meters HAAT. Site location existing tower FCC registration number 1050418, Lat/Lon (NAD 27): 28 – 54 – 41 N ; 98 – 26 – 28 W.

CHANNEL STUDY – EXHIBIT 14.1

Channel 209 study, which is a showing that this application will not create or cause interference to the stations and allocations that are relevant to this application. This study complies with 73.507 (a), (b), and (c) (1)

MEXICO – EXHIBIT 21.0

KWCB is less than 199 miles from the US – Mexico border and thus is subject to the Treaty between Mexico and United States. This treaty classifies NCE FM channel 209 as equivalent to Mexican Class B, which is the same as US Class C2. See Exhibit 22.1 Texas page from the Treaty as amended. The channel study (Exhibit 14.1) does not show any Mexican allocations or stations relative to this application.

COMMUNITY OF LICENSE – EXHIBIT 14.2

This application will keep the community of license as Floresville, Texas. Exhibit 23 is a map of the 60-dBu contour that will encompass the community of license as required by 73.515.

INTERFERENCE AND CONTOUR PROTECTION – EXHIBITS 15.0 – 15.2

This application complies 73.509 as demonstrated by Exhibits 15.0 through 15.3, which are a part of this application.

Exhibit 15.0 – Co-channel contour map

Exhibit 15.1 – First adjacent contour map

Exhibit 15.2 – Second and Third adjacent contour map

KRIS-TV – EXHIBIT 18

Exhibit 18 is a contour map showing that KWCB and KRIS contours do not overlap.
