Dear Jimmie and Art:

Enclosed please find a copy of an engineering report supporting Blue Ridge Broadcasting's Interference Objection against W2296EB.C Newberry, SC. The report was commissioned by BRB and compiled by Bruce Bellamy, President of Munn-Reese Broadcast Engineering Consultants.

Blue Ridge Broadcasting goes on record of being in full support of Newberry Broadcasting Company's planned request of a frequency move from 107.1 mHz to 101.7 mHz. We encourage the FCC to consider an immediate approval of this change of frequency so as not to delay the applicant's planned start of expanded service on FM for its' WKDK-AM, the sole broadcast station licensed to Newberry, SC.

Blue Ridge Broadcasting also goes on record to note that both licenses have worked together on options to resolve the interference concern without calling upon any FCC resources, to date.

Please advise with any questions. Thanks for your attention to this matter. We are committed to continuing to work together toward a mutually beneficial outcome.

Best regards,

A handwritten signature in black ink, appearing to read "Jim Kirkland", written over a large, stylized circular flourish.

Jim Kirkland
Executive Director

Cc: John Owens, General Manager, BRB
