Re: Channel 6 Interference Consent

Dear Ms. Evans

Forum Communications Company, licensee of Station WDAY-TV6 Fargo, North Dakota hereby states that it has no objection to the construction and operation of a proposed modification to noncommercial educational FM station KFJM, licensed to University of North Dakota on Channel 214 in Grand Forks, North Dakota, pursuant to the engineering specifications set forth in Attachment 1.

It is our understanding that the Station proposes to relocate the transmitter to an existing 180' microwave tower located on the southwest edge of Grand Forks, ND that is owned and operated by Prairie Public Broadcasting, Inc.

Our consent is conditioned on the University's agreeing at its expense to investigate expeditiously and in good faith and, if necessary, to resolve, any new complaints of Channel 6 interference to our viewers in the KFJM service area occurring within one year of filing of the KFJM license application covering the changes consented to by us herein. The University's reliance upon this consent in connection with its FCC application will constitute its acceptance of this condition.

Sincerely,

General Manager-Broadcasting  
WDAY-TV6, Fargo, North Dakota  
Forum Communications Company

## ATTACHMENT 1

**Station:** KFJM-FM

**Licensee:** University Of North Dakota
