Re: WCSX(FM), Birmingham, Michigan
Facility Identification Number: 25084
Greater Boston Radio, Inc.
Special Temporary Authority
Hybrid IBOC Digital Operation

Dear Counsel:

This is in reference to the request filed March 29, 2007, on behalf of Greater Boston Radio, Inc. ("GBR"). GBR seeks a brief extension of special temporary authority ("STA") to operate Station WCSX with power levels up to 10 decibels above the system specification of 20 decibels below analog carrier level,¹ for tests to be conducted in conjunction with iBiquity Digital Corporation.

Our review indicates that the Public Interest would be served by the brief period of testing proposed by GBR, and that the chance of interference to other stations is small.

Accordingly, the request for STA IS HEREBY GRANTED. Station WCSX may operate with a hybrid digital signal at variance from the specifications in the *Report and Order*,² as described above. Operation pursuant to this authority must be discontinued if complaints of interference are received, unless such complaints are immediately resolved by other technical means.

This authority expires on **June 18, 2007**.

Sincerely,

Charles N. Miller, Engineer
