

MINOR CHANGE APPLICATION
OUR THREE SONS BROADCASTING, LLP
WVSZ (FM) RADIO STATION
CH 297A - 107.3 MHZ - 4.5 KW
CHESTERFIELD, SOUTH CAROLINA
August 2006

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Our Three Sons Broadcasting, LLP ("OTSB"), licensee of WVSZ, Channel 297A, Chesterfield, South Carolina. OTSB herein submits an application to make minor changes in the facilities of WVSZ by proposing to increase the effective radiated power of the station. No other changes are proposed. It is noted that this application is being submitted as a contingent application with the application for station WRHM, Channel 297A, Lancaster, South Carolina.¹ As such, the licensed facilities of WRHM are not considered in this instant application.

OTSB is proposing to increase power for WVSZ at its existing site. As such, the Federal Aviation Administration ("FAA") was not apprised of this proposal. The tower on which the WVSZ antenna is mounted has been registered with the FCC and assigned Antenna Structure Registration Number 1202689. At the WVSZ site Channel 297A does not meet the Commission's spacing requirements to two other authorized facilities, therefore, processing pursuant to §73.215 is requested (Exhibit A).² All other exhibits used to certify this instant application were forwarded to OTSB and are available for submission to the Commission upon request.³

-
- 1) OTSB is also the licensee of WRHM.
 - 2) As noted above, OTSB is submitting a contingent application for WRHM. As such, only the contingent application is considered under §73.215.
 - 3) Only the radio frequency radiation limits were evaluated within the technical portion of this application. Any other environmental issues have been or will be addressed OTSB.
