RE: Flash Cut Application of LPTV Station KEJT, Salt Lake City, UT

Ladies and Gentlemen:

We understand the licensee of KEJT-CA, Salt Lake City, UT, CH 50 is preparing to "Flash Cut" this LPTV station to digital operation with an "Effective Radiated Power" of 15.0 kW. Further we understand that an FCC type outgoing interference analysis of this "Flash Cut" application shows interference to our translator K501E-LD of 2.98%.

The engineering consultant for KEJT-CA has provided us with a map showing that all of the interference is outside of Franklin County and is in fact in Utah, not Idaho. It is outside the area we are obligated to serve.

Accordingly we have no objection to the grant of the KEJT-CA application.

Signed by a person authorized to sign  
FCC documents
