Re: WRHC(AM), Coral Gables, Florida  
Facility Identification Number: 73945  
WRHC Broadcasting Corp.  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed December 1, 2009, on behalf of WRHC Broadcasting Corp. (WBC). WBC requests further extension of the special temporary authority (STA) originally granted on August 17, 2001, and modified on September 12, 2001, and June 9, 2003, to operate Station WRHC with temporary facilities.<sup>1</sup>

In support of the request, WBC states that its Application BP-20070119AGM to change the community of license to Doral remains pending due to environmental processing requirements and that it has made significant progress in assembling and providing the environmental submissions required by local officials.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control, and the licensee has taken all possible steps to expeditiously resolve the problem.

---

<sup>1</sup> WRHC is licensed to Coral Gables, Florida, for operation on 1550 kHz with 10 kilowatts daytime and 0.5 kilowatt nighttime, employing different transmitter sites and different directional antenna patterns during daytime and nighttime hours. (DA-2-U). Application BP-20070119AGM proposes a change in community of license to Doral, relocation of the transmitter, and operation with 1 kilowatt, unlimited hours, employing the same directional pattern daytime and nighttime (DA-1-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WRHC may continue to operate with the following facilities:

Geographic coordinates:	25° 51' 28" NL, 80° 28' 52" WL (NAD 1927)
Frequency:	1550 kHz
Operating Hours:	Unlimited
Operating power:	1.8 kilowatts daytime, 0.125 kilowatt nighttime
Antenna:	Nondirectional, employing existing Tower #7 authorized by Construction Permit BP-19860213AE.
ASRN:	1215856
Overall height	57.9 meters
Radiator height	56.9 meters (105.9°)
Antenna efficiency	316.2 mV/m/km/kW <sup>2</sup>

It will be necessary to further reduce power or cease operation if complaints of interference are received. WBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **June 10, 2010**.

Sincerely,

Charles N. Miller, Engineer  
Audio Division  
Media Bureau

cc: WRHC Broadcasting Corp.
