ENGINEERING STATEMENT ON EXISTING NCE SERVICES

NEW(FM) - 212A - COLEBROOK, NH

A computerized search of the F.C.C. CDBS was conducted to determine which, if any, existing NCE Class A, B1, B, C3, C2, C1, C0 or C FM stations provide 60 dBu F(50,50) service to the proposed service area. THE CDBS was also searched for AM NCE stations providing 5.0 mV/m service to the area. Pertinent contours (FM in green, AM in orange) were plotted on the attached Figure 1.

As shown, on the plot, the proposed operation will provide first NCE service to the entire proposed service area containing a population of 2,747 (2000 US Census).
