To Whom It May Concern

I am the Director of Engineering for Telesouth Communications, licensee of WKBB FM, 100.9Mhz. Telesouth Communications has a permit to make changes to WKBB, including a change of city of license to Mantee, Mississippi. I have witnessed and supervised the installation of the Electronics Research Inc. ("ERI") model MP-8C-DA-HW directional antenna to be used with WKBB. Further the installation was done according to the instructions ERI and the exact specifications as set forth in construction permit file # BPH-20090612AJR.

I have worked as a broadcast engineer for 14 years and have supervised or taken part in over 71 separate FM antenna installations, including 4 directional antennas. I have also worked with a contract engineering firm, handling over 90 radio stations, across 4 states.

Sincerely,

A handwritten signature in cursive script, appearing to read "Houston McDavitt".
