EXHIBIT 6
Engineering Statement

The applicant is presently authorized, under File No. BPTTL-20030805ACJ, to construct the reference station at a site near Knippa, Texas. It is now proposed to relocate the facility to a site near Sabinal, Texas, at the same time changing the antenna system. The attached Exhibit 6A indicates the degree of overlap between the authorized and proposed 74 dBu service areas.

A review of all available records (please see attached Exhibit 6B) indicates that this proposal might cause interference to existing stations. In this instance, analyses per O.E.T. Bulletin No. 69 indicate that population loss to any of these would not exceed 0.5% and appropriate waivers are requested.
