

Three Angels Broadcasting Network
Jon Bivin—Engineer
P.O. Box 220
West Frankfort, Illinois 62896

January 10, 2007

In evaluating the proposed Digital Flashcut for K44HE, an outgoing interference study was executed on the proposed parameters on channel 48(T) with an ERP of 1.5 KW. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference using the OET-69 Longley Rice methodology with a cell size of 1km and a 0.1km radial spacing, there was zero percent interference present found in each case when rounded to the nearest percent.
