

### **Environmental Protection**

EMF's proposed facility will be constructed on an existing tower and will cause no adverse effects to the surrounding environment at the site.

The proposed modification to WJKL is to be built on a rooftop. EMF believes that theoretical calculations would give inaccurate results at best.

Accordingly, EMF respectfully requests that the Commission grant the instant Construction Permit with the condition that EMF make RF measurements before constructing the facility and submit the results of those measurements, along with the theoretical change caused by the addition of its antenna, prior to Commission grant of Program Test Authority.

The rooftop is inaccessible to the general public. Building management personnel is required for roof access.

Further, after construction of the instant facility, EMF will continue to cooperate with other site users to reduce power or cease broadcasting as necessary to protect workers and others having access to the site from excessive levels of RF Radiation.
