

NEW DIGITAL LPTV STATION APPLICATION
DOCKINS COMMUNICATIONS, INC.
NEW DIGITAL LPTV STATION
CH 18 - (494-500 MHZ) - 15.0 KW
FARMINGTON, MISSOURI
March 2010

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Dockins Communications, Inc. ("DCI"). DCI herein proposes to construct a new digital low power television station on Channel 18 at Farmington, Missouri. The proposed antenna site coordinates for the new digital low power television station on Channel 18 at Farmington, Missouri are more than 75 miles from the reference coordinates of any city listed in Appendix A of DA 09-1487.

The antenna system for the proposed Channel 18 facility will be located on an existing tower. As such, the Federal Aviation Administration has not been apprised of this proposal. The tower is registered with the Commission and has been assigned Antenna Structure Registration Number 1061000.

The proposed Channel 18 digital operation complies with the Commission's interference rules, based on the use of the Longley-Rice, OET-69 Bulletin.¹ It is noted that the terrain was sampled at 0.1 kilometer, and a signal cell size of 1.0 kilometer was used, with 2000 Census population reviews. A simple emission mask was used in the calculations. Attached as

1) The Longley-Rice model was implemented on the Probe 3 computer model from V-Soft Communications. This model has been found to closely replicate the results provided by the Commission's computer model.

Exhibit A is a tabulation of the results of the Longley-Rice review showing the proposed facility causes no interference to any other existing, applied for, or proposed facility, based on the database used on the indicated study date. No full service station receives predicted interference above 0.5% of its population caused by this instant proposal. No secondary LPTV station receives predicted interference above 2.0% of its population caused by this instant proposal.

Attached as Exhibit B is a radio frequency radiation analysis showing the proposed Channel 18 facility will not cause the RF levels at the site to exceed the Commission's exposure limits.²

2) The undersigned has certified only the RF exposure limits for the proposed facility. All data regarding TV facilities contained herein was extracted from the CDBS database, based on the date indicated on the channel review. We assume no liability for errors or omissions in that database which may be adverse to the request contained herein.
