Application to Modify Digital Television Station Construction Permit

prepared for

Gray Television Licensee, LLC

WTOK-DT Meridian, MS

Facility ID 4686

Ch. 11 40 kW 160 m

Gray Television Licensee, LLC (“*Gray*”) is the licensee of television station WTOK-TV, pre-transition analog Channel 11 and digital Channel 49, Meridian, MS. A Construction Permit (“CP”, BPCDT-20080501AAQ) authorizes construction of the WTOK-DT post-transition digital facility on Channel 11, as established in Appendix B of the Seventh Report and Order in MB Docket 87-268. That CP authorizes operation with an effective radiated power (“ERP”) of 11.8 kW at 160 meters antenna height above average terrain (“HAAT”), with the existing analog Channel 11 antenna. A “maximization” CP was subsequently granted (BMPCTD-20080618ACJ) to authorize operation at 90 kW ERP with the same antenna.

Gray is authorized by Special Temporary Authorization (“STA”, BDSTA-20090112AOP) to initially operate the post-transition digital WTOK-DT facility at reduced power pursuant to the “phased implementation” procedures as described in the Report and Order in the Third Periodic Review.¹ The STA facility would operate with the antenna authorized under BMPCTD-20080618ACJ at 40 kW ERP, which is 44.4 percent of the authorized ERP.

Gray plans to operate WTOK-DT at 40 kW for at least a year before increasing the ERP to the authorized 90 kW. To avoid having to seek an extension of the phased implementation STA, *Gray* herein seeks a separate modification of the original CP to specify the same 40 kW operation that is authorized via STA. At the transition date, WTOK-DT will commence operation at 40 kW ERP.

¹*Third Periodic Review of the Commission’s Rules and Policies Affecting the Conversion to Digital Television*, MB Docket No. 07-91, FCC 07-228, released December 31, 2007.

Subsequently, *Gray* will implement the 90 kW facility as authorized by BMPCDT-20080618ACJ. **Gray intends on constructing the maximization facilities authorized in BMPCDT-20080618ACJ and specifically requests that the instant application not cause BMPCDT-20080618ACJ to be modified or superseded.**

The proposed digital Channel 11 operation will employ the existing non-directional antenna system licensed for WTOK-TV's analog Channel 11. The antenna is a horizontally polarized RCA model TF-12AH. Although there is no change in antenna height above ground or above mean sea level, the antenna HAAT is changed to 160 meters as recalculated from the USGS 3-arc second terrain database.

The Channel 11 antenna is top-mounted on the existing WTOK-TV antenna supporting structure, having FCC Antenna Structure Registration ("ASR") number 1041065. No change to the overall structure height and no tower work are required to carry out this proposal.

A map is supplied as **Figure 1**, which depicts the standard predicted coverage contours. This map includes the location of Meridian, WTOK-DT's principal community. As demonstrated thereon, the proposed facility complies with §73.625(a)(1), as the entire principal community will be encompassed by the 43 dB μ contour.

The proposed WTOK-DT facility's predicted service population provides a 123.2 percent match of the Appendix B facility, as detailed in the table below.

Post-Transition Population Summary

Population Summary (2000 Census) OET Bulletin 69 method	Appendix B	Proposed
Within Noise Limited Contour	307,041	377,453
Not affected by terrain losses	301,015	370,791
Lost to all interference	6,054	7,487
Net DTV Service	294,961	363,304
Match of Appendix B	---	123.17%

Population counts (using OET Bulletin 69² analysis, summarized below) show that the proposed facility would provide a greater than 100 percent population match of the original CP and the pre-transition analog operation. **Figure 2** supplies the proposed coverage contour along with those associated with the original post-transition CP (11.8 kW BPCDT-20080501AAQ), the maximization CP (90 kW BMPCDT-20080618ACJ), and the pre-transition analog Channel 11 facility. As shown thereon, the proposed 40 kW facility's service contour will cover all of the area covered by the original CP and the pre-transition analog operation.

Population Summary

	Interference-Free Population (2000 Census)
WTOK-TV/DT Facility	
Pre-Transition Analog Ch. 11 (BLCT-2503)	269,171
Original Post-Transition Ch. 11 CP (BPCDT-20080501AAQ)	305,527
Proposed Initial Digital Ch. 11 40 kW	363,304

A detailed interference study per OET Bulletin 69 shows that the proposal complies with the 0.5 percent limit of new interference caused to the Appendix B facilities and current post-transition authorizations of pertinent nearby stations. The interference study output report is provided as **Table 1**. Protection requirements towards authorized Class A stations are also satisfied.

The nearest FCC monitoring station is 408 km distant at Powder Spring, GA. This exceeds the threshold minimum distance specified in §73.1030(c)(3) that would suggest consideration of the monitoring station. The site is not located within the areas requiring coordination with “quiet” zones specified in §73.1030(a) and (b). There are no directional AM stations within 3.2 kilometers and no non-directional AM stations within 0.8 km of the site, based on information contained within the Commission’s database. The site location is beyond the border areas requiring international coordination.

²FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 (“OET-69”). A standard cell size of 2 km was employed. Comparisons of various results of this computer program (run on a Sun Sparc processor) to the Commission’s implementation of OET-69 show excellent correlation.

Human Exposure to Radiofrequency Electromagnetic Field (Environmental)

The proposal will involve use of an existing transmitting antenna. The use of existing transmitting locations has been characterized as being environmentally preferable by the Commission, according to Note 1 of §1.1306 of the FCC Rules. No tower construction or change in structure height is proposed. Therefore, it is believed that this application may be categorically excluded from environmental processing pursuant to §1.1306 of the Commission's rules.

The transmitting location is in close proximity to several other television and FM station facilities. In the post-transition period, operation of the current WTOK-TV digital (Ch-49, 400 kW / 136 m) and analog (Ch-11, 316 kW / 165 m) facilities will cease, leaving only the proposed digital Channel 11 operation at 40 kW using the current analog Channel 11 antenna. The RF exposure contribution from the proposed digital operation alone will be less than the current analog and digital facilities together. For completeness, following construction of the proposed facility, *Gray* will conduct RF exposure measurements (and/or detailed calculations) to evaluate the level of RF exposure resulting from the WTOK-DT facility. As necessary, based on these results and considering all emitters, appropriate exposure abatement procedures will be established and followed, in order to comply with the Commission's exposure limits. Such abatement procedures may involve the restriction of access to certain areas and/or facility modifications to reduce RF levels.

Considering the post-construction measurement and an appropriate abatement program, the general public and workers will not be exposed to RF levels attributable to the proposal in excess of the Commission's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, authorized personnel will be trained and/or supervised as necessary for access to any "controlled" areas. *Gray* will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower or

Certification

The undersigned hereby certifies that the foregoing statement and associated attachments were prepared by him or under his direction, and that they are true and correct to the best of his knowledge and belief.

SECTION III-D - DTV Engineering

Complete Questions 1-5, and provide all data and information for the proposed facility, as requested in Technical Specifications, Items 1-13.

Pre-Transition Certification Checklist: An application concerning a pre-transition channel must complete questions 1(a)-(c), and 2-5. A correct answer of "Yes" to all of the questions will ensure an expeditious grant of a construction permit application to change pre-transition facilities. However, if the proposed facility is located within the Canadian or Mexican borders, coordination of the proposal under the appropriate treaties may be required prior to grant of the application. An answer of "No" will require additional evaluation of the applicable information in this form before a construction permit can be granted.

Post-Transition Expedited Processing. An application concerning a post-transition channel must complete questions 1(a), (d)-(e), and 2-5. A station applying for a construction permit to build its post-transition channel will receive expedited processing if its application (1) does not seek to expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B"); (2) specifies facilities that match or closely approximate those defined in the new DTV Table Appendix B facilities; and (3) is filed within 45 days of the effective date of Section 73.616 of the rules adopted in the Report and Order in the Third DTV Periodic Review proceeding, MB Docket No. 07-91.

1. The proposed DTV facility complies with 47 C.F.R. Section 73.622 in the following respects:	
(a) It will operate on the DTV channel for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(b) It will operate a pre-transition facility from a transmitting antenna located within 5.0 km (3.1 miles) of the DTV reference site for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(c) It will operate a pre-transition facility with an effective radiated power (ERP) and antenna height above average terrain (HAAT) that do not exceed the DTV reference ERP and HAAT for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(d) It will operate at post-transition facilities that do not expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B").	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
(e) It will operate at post-transition facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the new DTV Table Appendix B.	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
2. The proposed facility will not have a significant environmental impact, including exposure of workers or the general public to levels of RF radiation exceeding the applicable health and safety guidelines, and therefore will not come within 47 C.F.R. Section 1.1307. Applicant must submit the Exhibit called for in Item 13.	
3. Pursuant to 47 C.F.R. Section 73.625, the DTV coverage contour of the proposed facility will encompass the allotted principal community.	
4. The requirements of 47 C.F.R. Section 73.1030 regarding notification to radio astronomy installations, radio receiving installations and FCC monitoring stations have either been satisfied or are not applicable.	
5. The antenna structure to be used by this facility has been registered by the Commission and will not require registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely effect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R. Section 17.7.	

SECTION III-D - DTV Engineering**TECHNICAL SPECIFICATIONS**

Ensure that the specifications below are accurate. Contradicting data found elsewhere in this application will be disregarded. All items must be completed. The response "on file" is not acceptable.

TECH BOX

1. Channel Number: DTV 11 Analog TV, if any 11
2. Zone: <input type="radio"/> I <input checked="" type="radio"/> II <input checked="" type="radio"/> III
3. Antenna Location Coordinates: (NAD 27) Latitude: Degrees 32 Minutes 19 Seconds 38 <input checked="" type="radio"/> North <input type="radio"/> South
Longitude: Degrees 88 Minutes 41 Seconds 28 <input checked="" type="radio"/> West <input type="radio"/> East
4. Antenna Structure Registration Number: 1041065 <input type="checkbox"/> Not Applicable <input type="checkbox"/> Notification filed with FAA
5. Antenna Location Site Elevation Above Mean Sea Level: 203.6 meters
6. Overall Tower Height Above Ground Level: 96.3 meters
7. Height of Radiation Center Above Ground Level: 84.5 meters
8. Height of Radiation Center Above Average Terrain : 160 meters
9. Maximum Effective Radiated Power (average power): 40 kW

<p>10. Antenna Specifications:</p> <p>a. Manufacturer RCA Model TF-12AH</p> <p>b. Electrical Beam Tilt: degrees <input checked="" type="checkbox"/> Not Applicable</p> <p>c. Mechanical Beam Tilt: degrees toward azimuth degrees True <input checked="" type="checkbox"/> Not Applicable</p> <p>Attach as an Exhibit all data specified in 47 C.F.R. Section 73.625(c). [Exhibit 43]</p> <p>d. Polarization: <input checked="" type="radio"/> Horizontal <input type="radio"/> Circular <input type="radio"/> Elliptical</p> <p>e. Directional Antenna Relative Field Values: <input checked="" type="checkbox"/> Not applicable (Nondirectional)</p> <p>[For a composite directional (not off-the-shelf) antenna, press the following button to fill in the relative field values subform.] [Relative Field Values]</p>	
<p>If a directional antenna is proposed, the requirements of 47 C.F.R. Sections 73.625(c) must be satisfied. Exhibit required. [Exhibit 44]</p>	
<p>11. Does the proposed facility satisfy the pre-transition interference protection provisions of 47 C.F.R. Section 73.623(a) (Applicable only if Certification Checklist Items 1(a), (b), or (c) are answered "No.") and/or the post-transition interference protection provisions of 47 C.F.R. Section 73.616?</p> <p><input checked="" type="radio"/> Yes <input type="radio"/> No [Exhibit 45]</p> <p>If "No," attach as an Exhibit justification therefor, including a summary of any related previously granted waivers.</p>	
<p>12. If the proposed facility will not satisfy the coverage requirement of 47 C.F.R. Section 73.625, attach as an Exhibit justification therefore. (Applicable only if Certification Checklist item 3 is answered "No.") [Exhibit 46]</p>	
<p>13. Environmental Protection Act. Submit in an Exhibit the following: [Exhibit 47]</p> <p>If Certification Checklist Item 2 is answered "Yes," a brief explanation of why an Environmental Assessment is not required. Also describe in the Exhibit the steps that will be taken to limit RF radiation exposure to the public and to persons authorized access to the tower site.</p> <p>By checking "Yes" to Certification Checklist Item 2, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.</p> <p>If Certification Checklist Item 2 is answered "No," an Environmental Assessment as required by 47 C.F.R. Section 1.1311.</p>	

PREPARERS CERTIFICATION ON SECTION III MUST BE COMPLETED AND SIGNED.

SECTION III - PREPARER'S CERTIFICATION

I certify that I have prepared Section III (Engineering Data) on behalf of the applicant, and that after such preparation, I have examined and found it to be accurate and true to the best of my knowledge and belief.
