

**MINOR CHANGE APPLICATION/
CITY OF LICENSE CHANGE
CUMULUS LICENSING LLC
NEW FM RADIO STATION
CH 245C2 - 96.9 MHZ - 8.1 KW
EFFINGHAM, KANSAS
January 2007**

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), permittee of a New FM station on Channel 244C3 at Humboldt, Nebraska. Cumulus proposes to change the community of license of the unbuilt New FM station from Humboldt to Effingham, Kansas, using the one-step application procedure as outlined in MB Docket #05-210 (released November 29, 2006). In order to implement this change of community of license, Cumulus proposes to relocate the New FM facility to a new site and upgrade to Channel 245C2.

Cumulus is proposing to implement this change at a new tower site. As such, the Federal Aviation Administration ("FAA") was apprised of this proposal. Once the FAA issues its anticipated Determination of No Hazard, the tower will be registered with the Commission.

As indicated on Exhibit A, the proposed change of community of license from Humboldt, Nebraska to Effingham, Kansas is mutually exclusive with the permitted New FM site; Channel 245C2, from a designated implementation/allocation site, meets the Commission's minimum distance separation requirements and a city grade signal will be delivered over all of Effingham,

Kansas.¹ A discussion of the gain and loss area is also included. Therefore, it is believed that this proposal meets the Commission's technical requirements for city of license change. It is noted that as part of this instant request, Cumulus also seeks the allotment of Channel 272C3 to Humboldt, Nebraska. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.²

-
- 1) Additionally, a non-terrain impacted 70 dBu contour would encompass the entire community of Effingham, Kansas.
 - 2) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All other necessary reviews have been, or will be, addressed by the applicant. Should any analysis indicate there are environmental issues, the issues will be addressed and the ultimate findings reported to the Commission before any tower construction is undertaken.
