Tulsa, OK 74129-2623

Re: W275AT (FX), Four Corners, NJ
CC Licenses, Inc.
Facility Identification Number: 138571
Special Temporary Authority
BSTA-20140908ABK ¹

Dear Mr. Langham:

This is in reference to the request filed September 8, 2014 on behalf of CC Licenses, Inc. ("CC"). CC requests an extension of the Special Temporary authority granted October 30, 2013 while it prepares to implement the facilities authorized in construction permit BPFT-20130109AEY.

The Special Temporary Authority granted October 30, 2013 is reinstated and extended. Specifically, W275AT may continue to operate with the following facilities:

Geographic Coordinates:	41° 10' 50" NL, 74° 45' 38" WL
Channel:	275D (102.9 MHz)
Effective Radiated Power:	0.043 kilowatt (H only, directional)
Antenna height:	
above ground:	10 meters
above mean sea level:	203 meters
above average terrain:	-79 meters

CC must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **March 14, 2015**.

¹ CC Licenses indicates that a "2013" date entered into the FCC's CDBS database for the STA expiration date of the original STA BSTA-20130913ABB, caused CC License to miss the filing date for a timely extension request. The referenced error has now been corrected. The STA grant letter did contain the correct STA expiration date, April 28, 2014. Because of the gap in time between the original STA expiration and the present extension request, we modify the application file prefix from "BESTA-" to "BSTA-" and process it accordingly.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Dale Bickel
Senior Engineer
