CERTIFICATION OF ANTENNA ASSEMBLY AND MOUNTING

On September 5th, 2006, I personally made a visual inspection of WPAY's new directional antenna to determine if it was assembled and installed as illustrated in the diagrams and instructions provided by the antenna manufacturer ERI.

The antenna was assembled and mounted on ERI's provided tower as shown in the ERI prints. All elements were assembled and positioned as shown in the factory print for project #16811 dated June 06, 2006.

These statements are submitted under penalty of perjury on September 21, 2006.
