

Engineering Exhibit

Radio – Television Multiple Ownership prepared for **Ramar Communications, Inc.**

This engineering statement has been prepared on behalf of *Ramar Communications, Inc.* (“*Ramar*”) regarding the proposed common attributable ownership of five radio stations and two television station in the Lubbock, TX region as listed below.

Ramar Radio and Television Stations

Call Sign	Ch/Freq.	Fac ID	Location
KLBB-FM	299C3	88795	Idalou, TX
KLZK(FM)	247C2	54684	New Deal, TX
KEJS(FM)	293C2	4019	Lubbock, TX
KXTQ-FM	229C1	55062	Lubbock, TX
KJTV(AM)	950	55061	Lubbock, TX
KJTV-TV	35	55031	Lubbock, TX
KLCW-TV ¹	43	77719	Wolfforth, TX

The radio-television crossownership rule is triggered when the Grade A contour of a television station entirely encompasses the community of license of a commonly owned AM or FM radio station. Additionally, the rule is triggered when the 60 dB μ (1 mV/m) FM station contour or the daytime 2 mV/m AM station contour entirely encompasses the community of license of a commonly owned television station. Television Grade A contour levels are defined in §73.683, however those specifications correspond to analog stations. With the transition to digital television (“DTV”) in 2009, full power television stations have ceased operating in analog.

The FCC has not defined a Grade A coverage contour level for digital television stations. For DTV stations, the coverage contours that have been recognized are described in §73.622(e) for DTV service and in §73.625(a) for principal community (city grade) service. Those contour levels are

¹KLCW-TV, licensed to *Woods Communications Corporation*, is attributable to Ramar pursuant to a joint sales agreement (JSA).

41 dB μ (DTV service) and 48 dB μ (principal community) for digital UHF stations such as KJTV-TV and KLCW-TV.

The lack of a Grade A contour for digital television was discussed in FCC staff action of DA10-312.² In that action, crossownership evaluation was based on the use of the §73.622(e) DTV service contour (described therein as the digital noise limited service contour, “NLSC”). The NLSC was considered to be equivalent to the Grade B contour for analog stations and therefore would encompass a larger area than the analog Grade A contour. Thus, the DA 10-312 decision applied a worst-case analysis regarding digital television-radio common ownership. Since the proposal addressed in DA 10-312 was found to be in compliance using the NLSC, there was no need to derive or consider a contour that might be equivalent to analog Grade A.

Applying the NLSC approach to the proposal at hand, the crossownership map attached as Figure 1 shows that the NLSC (41 dB μ) for KJTV-TV and KLCW-TV both encompass the entire principal community associated with each of the radio stations (Idalou, New Deal, and Lubbock), and each of the radio stations’ relevant contour (60 dB μ for FM, 2 mV/m for AM) encompass the principal communities associated with KJTV-TV (Lubbock) and KLCW-TV (Wolfforth).

Therefore, the radio-television crossownership rule is triggered and there is proposed common ownership of two television stations and five radio stations. This is permitted under §73.3555(c)(2)(i), which permits ownership of two commercial TV station with six commercial radio stations provided that at least 20 independently owned media voices remain. A separate exhibit is provided by counsel for *Ramar* indicating that the minimum number of voices is satisfied.

² See Order regarding BTC-20090518AHQ, BTCH-20090518AIO, BALH-20090518AIG, BALH-20090518AIK, released February 25, 2010.
