

Exhibit 14 - Statement B
DAYTIME INTERFERENCE ANALYSIS
prepared for
Corpus Christi Broadcasting Co., Inc.
KSIX Corpus Christi, Texas
Facility ID 13964
1230 kHz 1.0 kW ND-1 U

The proposed changes do not materially affect the allocation situation for KSIX. Specifically, the location of the KSIX daytime protected and interfering contours are essentially unchanged by the corrected data herein. Thus, no discussion or exhibits are supplied with respect to the daytime contour protection requirements of §73.37 with respect to other nearby AM stations. As shown in **Exhibit 10 - Statement A**, the coordinate correction is a result of the licensee's compliance with the Commission's Antenna Structure Registration program and no physical changes are proposed herein.
