

Radio One Licenses, LLC -- WPLY, Media, PA
Form 302-FM, March 2004

Exhibit 26

This is a certification that the WPLY directional auxiliary antenna system authorized in construction permit BXPB-20030903AAF was installed pursuant to instructions provided by the manufacturer, Electronics Research, Inc. (ERI).

I personally witnessed the field assembly and installation of this antenna between February 7 and February 13, 2004. The former WPLY main antenna (authorized by license BMLH-19840207AM) was first removed from the tower to accommodate installation of the new auxiliary antenna. To the best of my knowledge and belief, the new ERI model MP-3E-DA antenna was installed in compliance with the supplied installation drawings for ERI Project 10699 and also complies with all applicable terms of the FCC construction permit.

The proper azimuth alignment of the antenna bays has been checked and verified as correct by Kenneth M. Fretz, Sr., PLS, a surveyor licensed in the Commonwealth of Pennsylvania, as stated in Exhibit 27.

I presently hold an FCC General Class Radiotelephone Operator's License (Number PG-3-5568) and Society of Broadcast Engineers Certification as a Professional Broadcast Engineer (Number 50649), and have gained over thirty years of experience in the field of engineering at various AM, FM, and TV broadcast stations. My other qualifications are a matter of record with the FCC.

(signed)
