

Exhibit E-7

The provisions of Section 73.6020 with regard to land mobile service protection do not apply to the proposed facility. Although Chicago, IL is one of the areas in which land mobile protection must be afforded by such operations, this section of the Commission's Rules pertains to operations on channels 14 and 15. Since W34CK operates on channel 34, and would continue to do so, the land mobile protection provisions are not applicable to the proposed facility.
