

EXPRESS SURVEYING

March 31, 2015

Stephen Lariviere
iHeartMedia
75 Oxford Street
Suite 301
Providence, RI 02905

Dear Mr. Lariviere:

It was a pleasure meeting with you in the field on Tuesday, March 24th to discuss the required antenna measurements for the FCC.

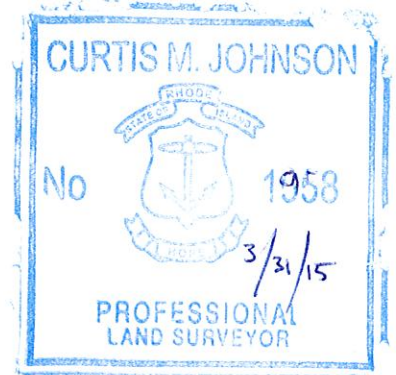

On Thursday, March 26th and Monday, March 30th, Express Surveying performed surveying measurements to establish the orientation of a recent antenna installation for B101. This antenna was located on the larger tower near the property in 114 Eastern Avenue, East Providence, RI.

Ground Points were established using the "Leica Viva RTK" GPS receiver. The antenna was observed from eight (8) of these ground points using a Sokkia Total Station. Our calculations revealed that the antenna orientation is at Azimuth 210 degrees plus or minus 1 degree true.

Please feel free to contact me directly with any question or discussion.

Regards,

Curtis M. Johnson, PLS
