 P.O. Box 220  
 West Frankfort, Illinois 62896

October 22, 2008

In evaluating the proposed digital displacement for W18DH FID 130220 with an ERP of 1.04kW, an outgoing interference study was executed using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent.
