Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

To who it may concern:

After considerable evaluation it has been determined that the assigned channel 227 for WMKK LPFM Facility id # 193025 would not be in the best interest. The signal strength of co-channel W227CW Lexington, Kentucky in and near Richmond is greater than anticipated. I am concerned with the strong signal in Richmond and Northward toward Lexington will not only effect coverage on WMKK LPFM but will also cause interference to W227CW which I have discovered have listeners in and near Richmond and Northern Madison County. For this reason, I do believe it to be in the best interest for the Commissions to grant this channel change to prevent any future problems in regards to W227CW.

Kindest Regards

Kym Long

President of Richmond Community Radio INC.
