

Exhibit 7

The purpose of this exhibit is to explain the difference between the antenna model number granted and the antenna model constructed in this application. WMPV-DT changed it's granted antenna model with one having a different model number.

Specifically, the ERI ATW16H3-HTP5-20H requested and granted was substituted with an ERI model number ATW16H3-HBP5-20H. The differences are only mechanical in nature and there is no change in electrical characteristics or height of the center of radiation.

The "HTP" designation in the antenna model number specifies a top-mount only antenna design, and the "HBP" designation specifies an antenna style which allows for conversion to an inverted mount antenna.
