

Compliance with C.F.R. 74.1204

Due to the lack of clarity of the topo map, in order to determine that there are no structures nearby that could be tall enough to enter the interference aperture, an aerial photograph of the site (obtained from Topozone.com) was examined. The aerial photo has been attached to this exhibit to demonstrate the lack of nearby structures.

Therefore, EMF respectfully maintains its request of a waiver of C.F.R 74.1204 based on no population within the area of predicted interference.
