Federal Communications Commission  
Washington, D.C.  
20554

*(Filed Electronically with FCC 302FM, Application for Station License)*

Dear Commission:

This 'Cover Letter' serves two purposes and is in Reference to: **BPED20060606AGM**.

Purpose 1 Introduction of FCC Form 302FM, Application For Station License, for Radio Station WPSR (FM).

Purpose 2 Request for "Program Test Authority".

WPSR (FM) herein is filing the required FCC 302FM, Application For Station License.

The WPSR (FM) "Construction Permit" has a "Restriction" that required WPSR to perform RFR Safety Measurements under "Equipment Test Authority". The RFR Safety Measurements have been performed and are documented within this FCC 302FM, Application For Station License.

The RF Measurements prove that the New 8 Bay, ½ Wavelength Bay Spaced Antenna meets all RFR Safety Requirements.

**(See "EXHIBIT 1 – RFR SAFETY VERIFICATION")**

The "Restriction" on the WPSR (FM) "Construction Permit" requires WPSR to "REQUEST" "Program Test Authority", when filing this FCC 302FM, Application For Station License.

**Accordingly, WPSR herein "Requests" the FCC to "Authorize" "Program Test Authority" for WPSR (FM).**

WPSR (FM), now having completed the "Equipment Testing" period (*Performing the required RFR Safety Measurements*), is presently "Off The Air", as required by the

“Construction Permit”, and must await the FCC’s review of the RFR Safety Measurements and the FCC’s Authorization for WPSR (FM) to return to the air via FCC’s grant of “Program Test Authority”.

WPSR (FM) anxiously awaits the FCC’s “Grant” of “Program Test Authority”, while we await the issue of a new license to cover WPSR (FM)’s operation with the “New FM Antenna”.

Sincerely

Francis (Frank) Hertel
