4/12/2016

Baxter Broadcast Service has been retained by Miracle Radio Inc. to perform real time measurements to ascertain if any change in Antenna Impedance has accrued on the WPNN AM Facility ID No. 43135 Pensacola, FL. and WVTJ AM Facility No. 9319 Pensacola FL. due the mounting of an antenna on the AM tower. All measurements were made with all transmitters operating at reduced power.

Measurements were made on site Antenna registration number 1254945 using a Calibrated Delta OIB 1 Impedance bridge. Both WPNN AM and WVTJ AM showed to be in compliance with less than a 2 percent change from licensed value, after the W279CY antenna was mounted on the tower as per permit No. BPFT-20160129ADY.
