

EXHIBIT 11

This narrative exhibit is submitted to demonstrate that this proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but three other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contour of WMGS, Wilkes-Barre, PA, demonstrate that there is no prohibited contour overlap between these three stations and the instant proposed FM translator facilities. It should be noted that protection is not required to the vacant, unapplied for allotment at Susquehanna, PA. Two currently operating FM translators have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The five facilities that have been included on the attached maps are: WBZD-FM, 93.3, Muncy, PA (57 dBu contour to proposed 37 dBu interference contour); WMGS, 92.9, Wilkes-Barre, PA (54 dBu contour to prop. 94 dBu int. contour); WSJR, 93.7, Dallas, PA (60 dBu contour to prop. 100 dBu int. contour); W227BA, 93.3, Bear Creek, PA (60 dBu contour to prop. 40 dBu int. contour); and W227AB, 93.3, Endicott, NY (60 dBu contour to prop. 40 dBu int. contour).

W281AS 93.3 Russell Hill, PA 74.1204(d) Narrative and its related exhibits are included to show allowable overlap under Section 74.1204(d) with this proposal's 94 dBu interference

contour and the 54 dBu coverage contour of WMGS, Wilkes-Barre, PA. It should be noted that the attachment "Proposed Translator Interference Contour Analysis" shows the 34 dBu contour of this proposal completely contained within the boundaries of the U.S. with regards to any International Agreements. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
