RINCON, GEORGIA
December 2005

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Tama Radio Licenses of Savannah, GA, Inc. ("Tama"), licensee of WMZD, Channel 261C2, Statesboro, Georgia. Tama also holds an outstanding permit to implement a change in community of license to Rincon, Georgia (BMPH-20050622AAC). Tama herein proposes to modify the outstanding permit by relocating the facility a short distance from the site proposed in the underlying permit.¹ No other change is proposed. It is noted that the licensed facilities of WMZD are presently silent, due to a loss of the station's transmitter site. Therefore, it is respectfully requested that this instant modification be expedited to allow WMZD to restore service.

Tama proposes to locate the antenna system for WMZD on a new tower. As such, the Federal Aviation Administration ("FAA") was apprised of this proposal. Once the FAA issues a Determination of No Hazard, the tower will be registered with the FCC. It is noted that due to the location of the proposed WMZD facility in close proximity to another FM station, the worksheets associated with FCC Form 301 could not be used to certify compliance with the radio frequency radiation rules. As such, attached as Exhibit A is a study which shows the proposed WMZD facility is in compliance with the RF limits.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Tama and is available to the Commission upon request.

1) The slight relocation is to accommodate the placement of the tower at the site.
