

TECHNICAL STATEMENT  
RADIO MULTIPLE OWNERSHIP ANALYSIS  
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. (“CCBL”). CCBL proposes to modify WMCM(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

<b>Call Sign</b>	<b>City of License</b>	<b>Facilities</b>
WMCM(FM)(PROPOSED)	Rockland, ME	Channel 277B, 16 kW, 235 m
WRKD(AM)	Rockland, ME	1450 kHz, 1 kW, U, ND1
WBFB(FM)	Belfast, ME	Channel 284B, 10 kW, 335 m
WABK-FM	Gardiner, ME	Channel 282B, 50 kW, 113 m
WCME(FM)	Boothbay, ME	Channel 244B1, 15.5 kW, 127 m

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.<sup>1</sup>

There are no other principal community coverage contours controlled or proposed to be controlled by CCBL that overlap or intersect the proposed modifications to WMCM(FM)(PROPOSED).

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of WMCM(FM)(PROPOSED), WRKD(AM), WBFB(FM), WABK-FM and WCME(FM) are shown in Figure 1 herein. There are three “radio markets” for analysis under the Commission’s Rules.

Market 1 is defined by the principal community contours of WMCM(FM)(PROPOSED) and WBFB(FM).

Market 2 is defined by the principal community contours of WMCM(FM)(PROPOSED) and WRKD(AM).

Market 3 is defined by the principal community contours of WMCM(FM)(PROPOSED), WABK-FM and WCME(FM).

---

<sup>1</sup> See Section 73.3555 of the FCC Rules.

## Count of Stations in Defined Markets

The number of radio stations in each “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Market 1, there are 26 radio stations (4 AM and 22 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

In Market 2, there are 10 radio stations (2 AM and 8 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

In Market 3, there are 31 radio stations (12 AM and 19 FM), including the subject co-owned stations, that intersect or overlap the “radio market.”

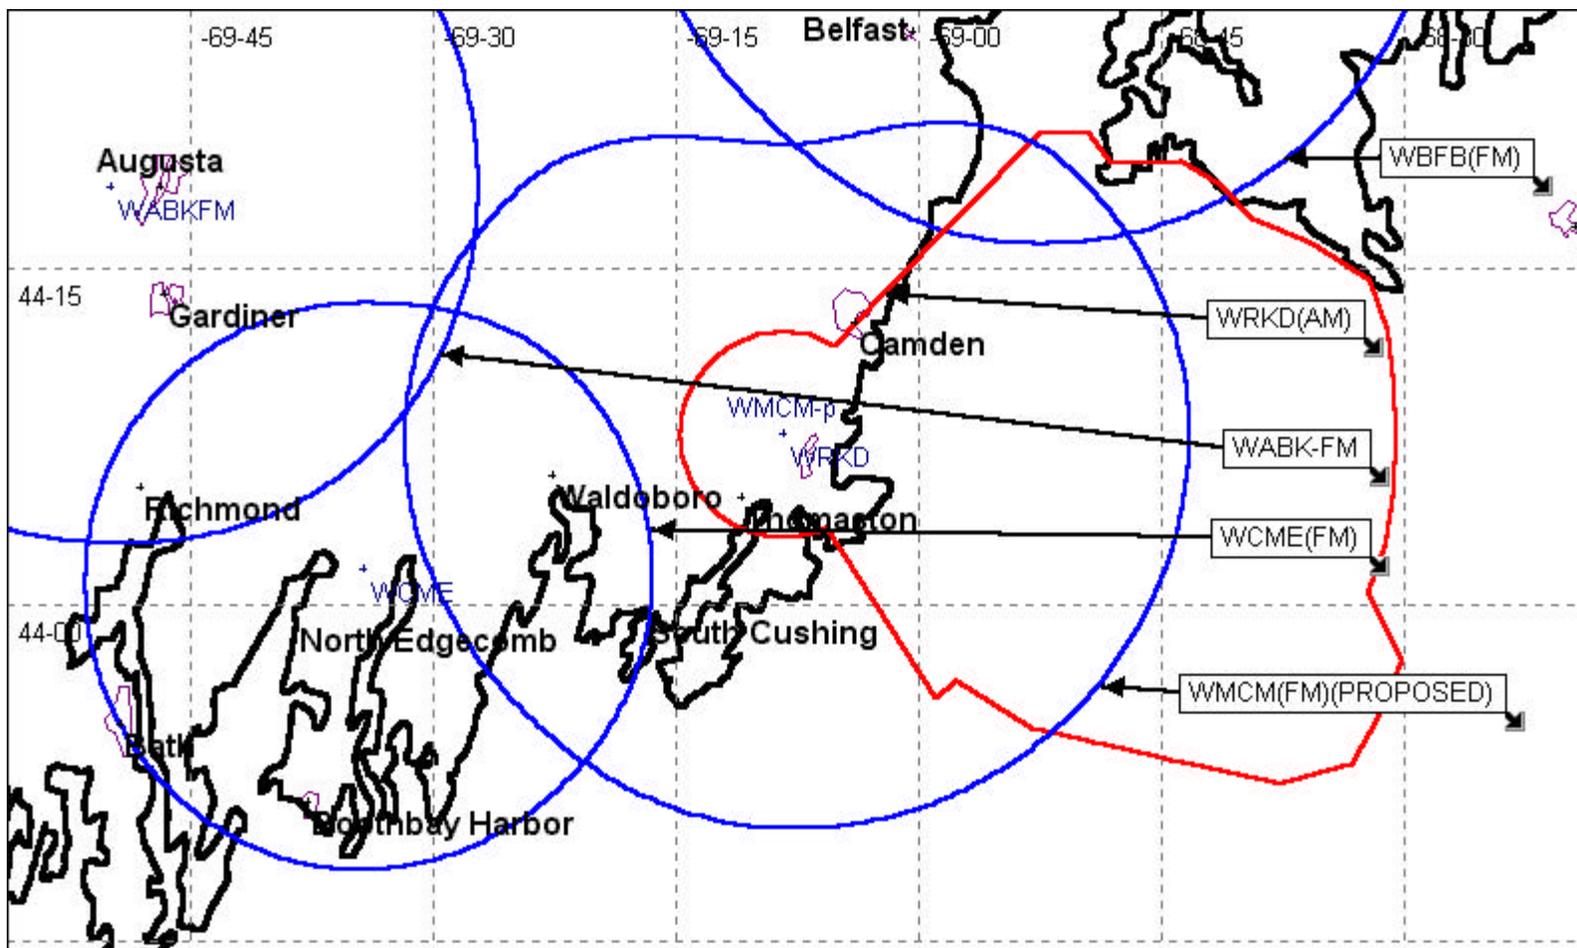

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.
